MATHEMATICAL DISCOVERY

The 10-Number Shortcut

A Hidden Mathematical Pattern Explained Visually

Σ

3

$\times$

10

Discovered by an Engineer 

ENGINEERING JOURNEY

My Learning Journey

*While working on an engineering project,
I noticed a strange pattern...*

Engineering Project

Complex calculations
needed

Pattern Noticed

A recurring numeric
rhythm

Shortcut Found

Validated across 100+
cases

THE PROBLEM

We often add sets of 10 numbers manually...

11 – 20	
11	12
13	14
15	16
17	18
19	20

21 – 30	
21	22
23	24
25	26
27	28
29	30

31 – 40	
31	32
33	34
35	36
37	38
39	40

What if there was a faster way?

*"The middle numbers
hold the secret..."*

15 & 16 are the middle numbers

Average of 15 & 16

= 15.5

Multiply by 10

= 155

The Formula That Changes Everything

$$\text{SUM} = (\text{Average of Middle Two}) \times 10$$

1

Pick any 10
consecutive
numbers

2

Find the two
middle numbers

3

Average them
(add $\div$ 2)

4

Multiply the
result by 10

V I S U A L E X A M P L E

Numbers 11 → 20

Middle: 15 & 16

Average of 15 & 16

$$(15 + 16) \div 2 = 15.5$$

Multiply by 10

$$15.5 \times 10 = 155$$

✓ Sum = 155

IT WORKS EVERY TIME

More Examples

21 – 30

Middle Average

25.5

× 10

Sum =

255

31 – 40

Middle Average

35.5

× 10

Sum =

355

991 – 1000

Middle Average

995.5

× 10

Sum =

9,955

WHY IT WORKS

The Symmetry Principle

"The sequence is always symmetrical."

 Every pair sums to the same value

Always = first + last

 Perfect balance around the center

15.5 is the midpoint

 5 pairs $\times$ pair-sum = total

$5 \times 31 = 155$

REAL-WORLD APPLICATIONS

Where This Shortcut Shines

Fast Mental Math

Compute large sums in seconds without a calculator

Pattern Recognition

Spot arithmetic sequences and hidden structure faster

Competitive Exams

Save precious seconds in aptitude and entrance tests

Teaching Math

Great visual aid for explaining averages to students

Engineering Work

Quick sanity-check on sequential measurement data

Puzzle Solving

Recognize consecutive number patterns in problems

✦ Try It Now!

Try the shortcut with any 10 consecutive numbers.

Pick: 41 → 50

Middle avg = 45.5 → Sum = 455

Verify it on paper — it always works! ✓
